

# Flat Belt Material Options

MAA — Multipurpose Belt Surface: Smooth, White Urethane Anti-Static: Yes

MAB — Multipurpose Belt
Surface: Smooth, Sealed Edge Urethane

Anti-Static: Yes

MAE — Multipurpose Belt
Surface: Smooth, White Urethane
Anti-Static: Yes

FAA — High Friction Belt Surface: Snakeskin, Grey PVC Anti-Static: No

FAF — High Friction Belt Surface: Rough Top, Green PVC Anti-Static: Yes

AAA — Accumulation Belt Surface: Fabric, White Urethane Anti-Static: Yes

AAC — Accumulation Belt
Surface: Fabric, Black Urethane
Anti-Static: Yes

IAF — Cut Resistant Belt
Surface: Dimple Top, Black PVC

Anti-Static: Yes

EAB — Multipurpose Belt
Surface: Smooth, Translucent Urethane
Anti-Static: Yes

EAC — Multipurpose Belt
Surface: Smooth, Translucent Urethane
Anti-Static: Yes

PAB - Multipurpose Belt

**Surface:** Smooth, Translucent Urethane **Anti-Static:** Yes

**PAD** — Multipurpose Belt

Surface: Smooth, Translucent Urethane
Anti-Static: Yes

PAE - Multipurpose Belt

**Surface:** Smooth, Translucent Urethane **Anti-Static:** Yes

TAA - Multipurpose Belt

Surface: Smooth, Translucent Urethane Anti-Static: Yes

TAB - Multipurpose Belt

**Surface:** Smooth, Translucent Urethane **Anti-Static:** Yes

RAE - Multipurpose Belt

Surface: Smooth, Translucent Urethane

Anti-Static: Yes

#### Reduced Downtime -

The unique snap-in sealed tail assembly makes belt changes quick and easy. Lube-for-Life bearings eliminate the need to re-lubricate the bearing for the life of the bearing.

### **Specifications**

» Widths: 12", 18", 24"

» Lengths: 2' to 12'

» Speeds: Incrementally variable from 7 to 50 fpm» Motor: Sealed construction design, IP-54 rating

» Motor Life: 15,000 hours

» Load Capacity: 12" - 50 lbs; 18" & 24" - 75 lbs

Input Voltage: 115vac / 230vac, 1ph
 Control Wire Lengths: 12", 24", 48", 96"

# Save Space

IS175-ID conveyors offer maximum flexibility. Their embedded motor takes less space than traditional conveyor drive packages.

# Low Profile Design

Only 2.54" tall, these conveyors will fit almost any application.

# Safe, Efficient, Single Piece 24vdc Motor o

Integrated internal gears give you maximum torque, speeds up to 50 feet per minute and loads up to 75 lbs. The integrated motor makes IS175-ID Conveyors maintenance-free, freeing you from lubricating bearings or drive packages. The motor's low voltage protects workers from dangerous currents.

# **Easy Application Integration**

The variable speed control card integrates easily with automation systems for "run-on-demand" applications, using inhibit/run controls from devices such as timers and photo-eyes. Lighted indicators identify status at a glance. The card can be frame-mounted or mounted in a NEMA 12 control box (shown at right).

# **Controller Specifications**

- » Variable speed (in increments) via dip switches
- » Run/Stop input
- » LED status indicators
- » Built-in thermal overload protection
- » NEMA Type 1
- » Accelerate/Decelerate Capable

# Side Rails & Flared Sides

### Fixed Side Rails

Side rails can be used to contain and guide product on the conveyors. They are available as 1/3", 1" (top left) and 2" . You may also order them with seals to keep product or contaminants from slipping under the belt (right) or with a ware strip to protect the sides and product from scuffs and marks (bottom left). Quotable through the Configurator.

# 2-Axis Adjustable Guides

Adjustable side rails offer the ultimate in flexibility. These guides may be adjusted vertically for varying product heights, or vertically as full width or indented guides. These guides are available with thumb screws (shown) for tool-less adjustments. Quotable through the Configurator.

### Flared Side Rails

Flared side rails utilize adjustable side rail attachments to guide falling products to the conveyor. They are traditionally used with cleated conveyors for product control. End stops may also be used t prevent product from falling from the tail section of the conveyor. A swing gate attached to the end stop also aids in guiding product and accommodates cleats up to 2" in height. Quotable through the Configurator.

# Stands and Mounts

#### **Aluminum Stands**

Aluminum stands are our most popular support option. They offer adjustability in an economical package.

No additional mounts are required. Note: Conveyors 4" wide and under will have the stand framework on the outside of the conveyor. The minimum height range for these conveyors is 12–15 inches.

### **Cross Ties**

Cross ties increase the stability of the stands. It is suggested that a set of cross ties is ordered for every 12' of conveyor.

Note: Aluminum stands sold separately.

## **Outrigger Stands**

The Aluminum Outrigger Stand offers a wider base for enhanced stability, especially for narrow conveyors.

Note: No additional mounts are required.

# Universal Adjustable Side Mount

Frame Mounted version attaches directly to the frame with mounting holes every 3" (compatible with cleats 1" or lower). T-slot mounted version attaches to 1" Side Rails, 2" Side Rails, the Single T-slot and the Multi T-slot (compatible with cleats 1/2" or lower). Brackets are universal and work on either side of conveyor.

Adds 1.64" to top of belt height.

### **Universal Raised Side Mount**

Attaches directly to the conveyor frame. The frame has mounting holes every 3". Brackets are universal and can work on either side of the conveyor. Cannot be used with cleated belts.

Adds .135" to top of belt height

## Additional Products Available from QC Conveyors

In addition to our space saving IS175-ID conveyors, we offer a variety of other products. Other options in our Industrial Series include IS125 conveyors built for heavier loads and IS300 conveyors which feature a tilming belt with accuracty to ±.015". Automation Series conveyors are built on a rigid aluminum frame, and HydroClean Series conveyors are built on a stainless steel platform with a design that makes them easy to clean. Please visit our website or contact your local distributor for more information.
